14. Scroll to Left Dashboard
15. Dashboard Navigation buttons
16. Scroll to Right Dashboard
17. Date and Time Display
18. Login User ID
19. IP Address
20. Encryption Level

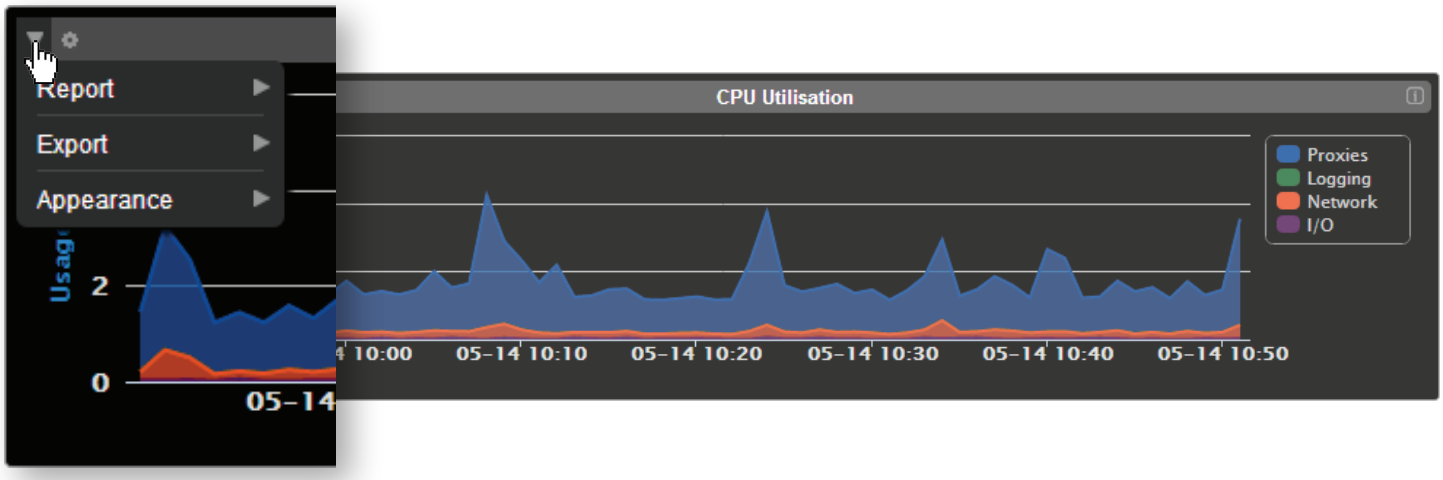
Widget Functions
Overview

Each individual widget has three main buttons:

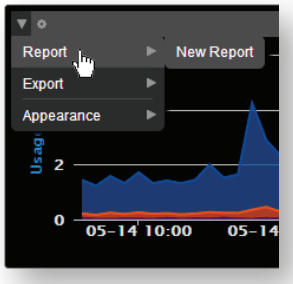
- Functions Menu
- Filters Menu
- Information Display

The options available for the *Functions Menu* and *Filters Menu* may vary depending on the widget. For this example we are using the *CPU Utilisation* widget.

Functions Menu

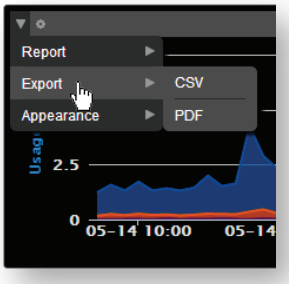


Report options



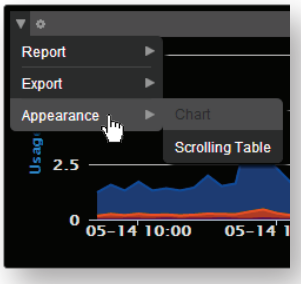
Adds this widget to a new or existing report. This will be covered in *Creating Customized Reports*.

Export options



Exports the widget to an A4 PDF or CSV file. The graphics will be adjusted to use a printer friendly colour scheme.

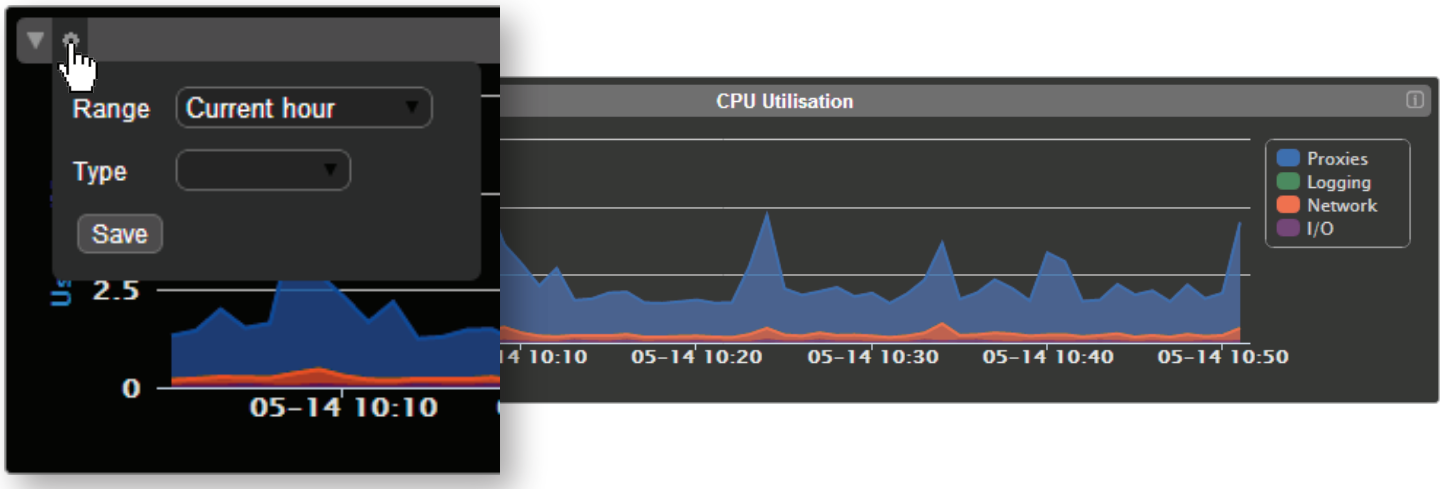
Appearance options



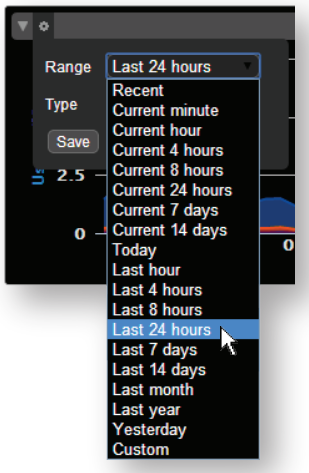
Option to switch the display data between a graphical chart or a text-based table.

When you click on the Function menu button you will be presented with options, this may vary depending on the widget. In this example, there are three options: Report, Export and Appearance.

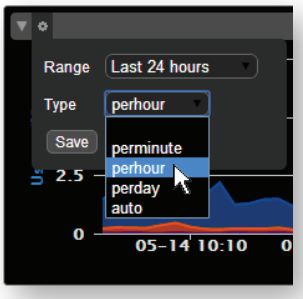
Filters Menu



Range options

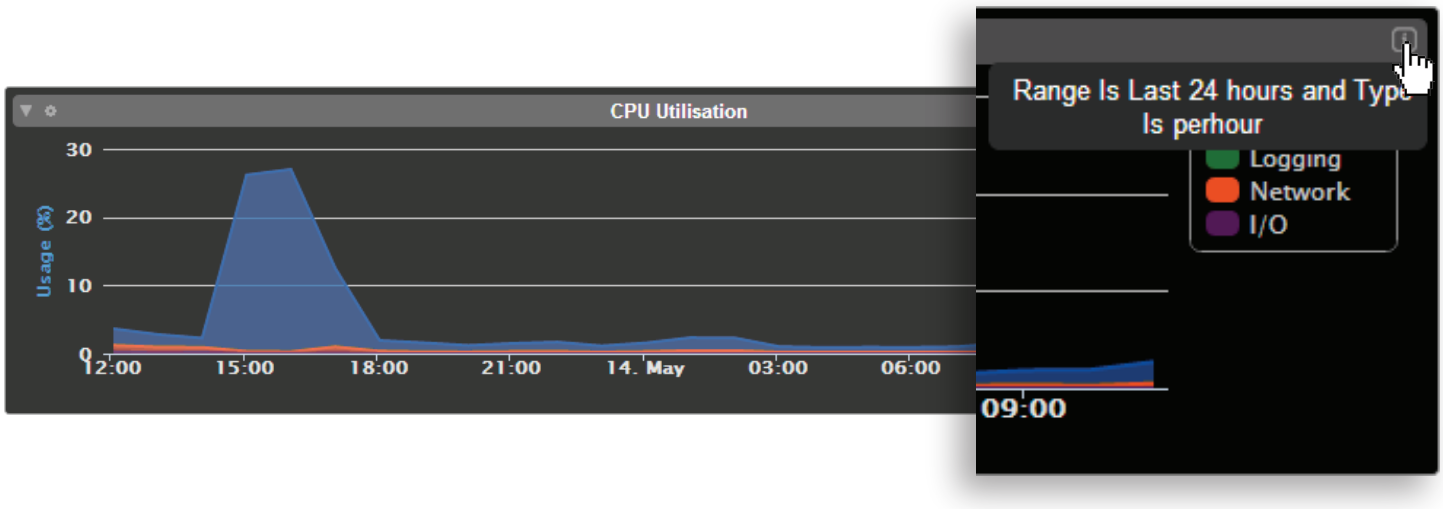


Type options



From the drop-down menu, you can choose the Range and the Type to be displayed in the widget. Once the options are selected, click the Save button. The widget will display the data in the new settings.

Information Display



When you mouse over the information icon, the filter settings will be displayed. In this instance only the range and type are displayed but there more setting will be displayed depending on the type of widget.

Summary

The HTML-5 based Network Box Dashboard is designed to show you real-time statical data of the status of your network, box or whatever you want to see, in an intuitive and easy to understand way. This is fully customisable giving you complete control on how you want to monitor your network.
