

Usage / Deployment Instructions

Step 1: Use the browser to access the application at <http://<instance ip address>> replace **<instance ip address>** with the actual IP address of the running instance.

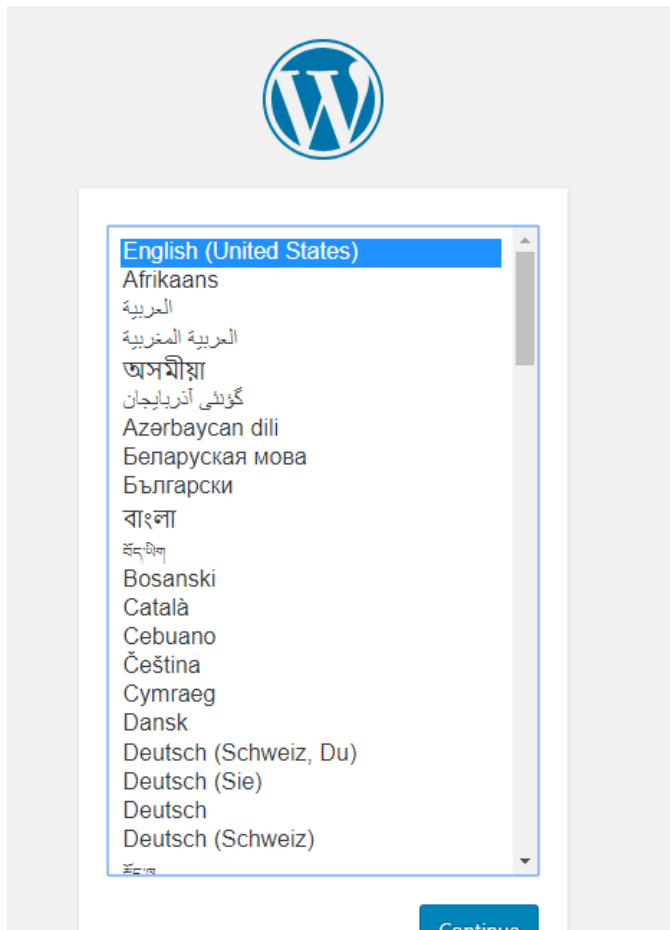

Note: You will get the Instance IP Address as shown in the screenshot below:

Instance ID/Name	Tags	Monitoring	Zone	IP Address	Status	Network Type	Configuration	Billing Method	Actions
i-bp12ureidz7tmyzc4c5e			Hangzhou Zone B	47.96.20.58(Internet) 172.16.143.98(Private)	Running	VPC	1 vCPU 1 GB (I/O Optimized) ecs.n1.tiny 5Mbps (Peak Value)	Pay-As-You-Go November 27, 2018, 10:23 Create	Manage Connect Change Instance Type More

Step 2: Hit the public ip on the browser as follows:

public ip/wordpress

Start with the configuration as shown below:

Step 3: Enter the details of your choice

Welcome

Welcome to the famous five-minute WordPress installation process! Just fill in the information below and you'll be on your way to using the most extendable and powerful personal publishing platform in the world.

A new, modern publishing experience is coming soon.

Take your words, media, and layout in new directions with Gutenberg, the WordPress editor we're currently building.

Test the new editor today.

You can take Gutenberg for a spin (and share your feedback, if you'd like) before we officially release it, by installing it as a plugin. You can help by [testing](#), [filing bugs](#), or contributing on the [GitHub repository](#).

Not quite ready?

The new editor will be enabled by default in the next major release of WordPress. If you're not sure if your current theme and plugins are compatible, we've got you covered. Install the [Classic Editor plugin](#) to keep using the current editor until you're ready to switch.
